PROJECTS UNDERTAKEN

Face Recognition Based Attendance | (July'22)

- It's a progressive model using python and HOG method
- For marking the attendance it uses Name, Time, Date
- Other important features includes using Hog method it can store 2000 student, emp, or any worker persons attendance
- Using hog method it can generate 120 measurements of single human which helps the system to compare the data and gives the accurate output
- Using open-cv we have gives the accese to the camera so it can capture persons attendance
- We can add student data with single image

Delux Furniture (Website) (Fab'26)

- It's a furniture shopping website where people can shope there needed woods
- It's a progressive model usig Html Css
- Have a eye catching user interface
- used hover and transition to make the website more user interactive
- used href tag to navigate one page to another
- I have developed its gui using basic of html,css
